Description

Very good punched copy

Strategy & Tactics No.54 Jan-Feb 1976

GAME:

Dixie (R.Simonsen)

North vs South in the 20th Century. Dixie is a brigade/division/corps level simulation of an alternate-history conflict. Dixie posits that the Confederate States of America had successfully waged the first American Civil War and survived as an independent political/economic entity. The game further posits that these two independent countries wage a modern war during the late 1930s.
